## **DETAILED ACTION**

### ***Priority***

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 10/193,741, filed on July 9, 2002.

### ***Drawings***

2. The drawings filed on September 26, 2003 have been accepted by the examiner as formal drawings.

### ***Specification***

3. The disclosure is objected to because of the following informalities: (A) The specification fails to indicate in paragraph [0001] on page 1 that the parent case is now U. S. Patent No. 6,662,767. (B) The word --the-- has apparently been omitted between the words "of" and "present" in the second line of paragraph [0013] on page 4. Appropriate correction is required.

### ***Election/Restrictions***

4. This application contains claims directed to the following patentably distinct species of the claimed invention: (A) Figures 1-3, and (B) Figures 4-6.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 15 appear to be generic.

Art Unit: 1724

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

### ***Conclusion***

5. Action on the merits of the claims is held in abeyance pending applicant's response.
